

And Remember...

No matter where you go, there you are. -Confucius-

Owner, Yvonne Allan-Abker, cuts the ribbon at the Grand Opening of YMA's new state of the art facility

No Matter Where We Go...

...there we are. Y Medical Associates, Inc. first opened their doors in 1988. With a vision and a handful of dedicated professionals a journey was begun that would consistently provide quality Home Infusion Services for over 20 years.

This kind of success cannot be realized or maintained without a dedicated staff. YMA has been extraordinarily successful for that reason. No longer just a handful, the ever growing team of dedicated professionals at Y Medical are always working together toward one

unified goal; Patient safety and customer satisfaction. They are the very reason for the growth that has been achieved. The staff at YMA are the success of the company.

Change and growth are inevitable. The challenge is to accomplish the task without a pause, No matter the location, the size of the building or the number of employees, Y Medical continually meets the demands of an ever growing and ever changing industry. And remember... "No matter where we go

... Our Patients Come First"

WHAT IS IVIG (INTRA VENOUS IMMUNE GLOBULIN)?

IVIg is a collection of Y shaped antibodies called IgG. IVIg is a plasma product in solution containing human antibodies or proteins that provides immunity within a few days of injection and lasts for about 2 months. It is formed by taking antibodies from about 20,000 donors and mixing them together. IVIg has proven effective in several immune system disorders, including nearly all autoimmune conditions even CIDP and GBS. For immune deficiency where the body does not make enough antibodies, IVIG supplies them. For autoimmune disorders like GBS & CIDP,

there is a abnormal autoantibody being formed which is inactivated by IVIG.

The sooner you can treat a patient with IVIg the better the results. There is a window of opportunity usually within the first 18 months during which IVIg administration is ideal. The longer you wait to treat with IVIg the longer it will take for IVIg to work.

YMA specializes in IVIG infusion therapy treating both adult and pediatric patients. Call us for more information.

We're a "HIT" in Your Community

What is HIT? ...

Home Infusion Therapy, or "HIT", provides intravenous medications to patients at home. Patients and doctors find the convenience and comfort of being at home very appealing. Patients can often return to their normal routines and even, in some cases, return to work while still on therapy.

Our compounding pharmacy services allow us to formulate medications to your specific needs. Our nursing services provide advanced care for the safe administration of many home infusion therapies.

WE'VE MOVED

8840 N MacArthur
Irving, TX 75063

OUR NEW SPA-LIKE PRIVATE INFUSION SUITES

Your Own Private Oasis

Unlike most infusion facilities, we provide you with your own private suite where you can be comfortable while receiving your infusion treatment.

Safely Monitored

Next to your comfort, safety is our utmost priority. Our specially trained nursing staff are with you throughout the entire infusion process. By situating our monitoring station within clear view of our patients we are able to provide each with a maximum amount of privacy while continually ensuring patient safety.

Amenities

Whether you choose to rest or check your e-mail by use of the available WiFi connection, watch TV or just relax to sounds of music or the soothing waterfall fountain, the oversized comfort of the heated, massaging, leather recliner will make any one of your choices a stress free one.

Simple Thoughts

The human body has been designed to resist an infinite number of changes and attacks brought about by its environment. The secret of good health lies in successful adjustment to changing stresses on the body.
